DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1, 2, 11, and 12 in Paper No. 5 is acknowledged.

Claims 3-10 and 13-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Amemiya et al. '996. Amemiya discloses (see, for example, FIG. 1) a semiconductor device comprising a polycrystalline silicon resistor 10. In claim 1 of Amemiya, Amemiya discloses the doping of the polycrystalline silicon resistor as being higher than 1×10^{20} atoms/cm³.

Product-by-Process Limitations

4. While not objectionable, the Office reminds Applicant that "product by process" limitations in claims drawn to structure are directed to the product, per se, no matter how actually made. *In re Hirao*, 190 USPQ 15 at 17 (footnote 3). See also, *In re Brown*, 173 USPQ 685; *In*

Art Unit: 2815

re Luck, 177 USPQ 523; *In re Fessmann*, 180 USPQ 324; *In re Avery*, 186 USPQ 161; *In re Wethheim*, 191 USPQ 90 (209 USPQ 554 does not deal with this issue); *In re Marosi et al.*, 218 USPQ 289; and particularly *In re Thorpe*, 227 USPQ 964, all of which make it clear that it is the patentability of the final product per se which must be determined in a "product by process" claim, and not the patentability of the process, and that an old or obvious product produced by a new method is not patentable as a product, whether claimed in "product by process" claims or *otherwise*. Note that applicant has the burden of proof in such cases, as the above case law makes clear. Thus, no patentable weight will be given to those process steps which do not add structural limitations to the final product.

Claim 12 contains the limitation "formed using a late implant doping technique" which does not add any structural limitations to the final product. Therefore such a limitation is given no patentable weight.
